SUMMARY

Results-driven Full-Stack Developer with over 5+ years of experience in designing and developing scalable web and mobile applications. Proficient in Python, Django, FastAPI, React.js, and React Native, with hands-on experience in AWS for cloud-based solutions. Adept at leading cross-functional teams, delivering high-quality software solutions, and integrating front-end and back-end technologies to enhance user experience and application performance.

WORK EXPERIENCE

Senior Software Engineer

SimStar ASIA LTD.

Dec 2025 - Present

- ODOO Developer - Python

Software Engineer

Vision11 (HaaNaa) (GURUGRAM)

Jul 2025 - Aug 2025

- Contributed to the development of mobile applications in the Real Money Gaming (RMG) domain.
- Worked on React Native, MobX, and API integrations to build scalable and user-friendly features.
- Collaborated with cross-functional teams to deliver modules under tight timelines.

Software Engineer

techiebears pvt. ltd (MUMBAI)

Feb 2020 - Apr 2025

- Developed and maintained scalable RESTful APIs using Django, FastAPI, and NestJS across multiple real-time applications.
- Built and deployed cross-platform mobile applications using React Native, delivering responsive, user-centric interfaces.
- Integrated diverse payment gateways, including Amazon PayFort (UAE), Razorpay (India), and MyFatoorah (UAE) to support global financial transactions.
- Led implementation of multiple payment flows: full payment, split payment, pay at venue, and loyalty-based (Pi Coins) systems.
- Collaborated in Agile teams, contributing to sprint planning, daily stand-ups, and timely delivery of key features.
- Wrote automated unit and integration tests to ensure application reliability and maintain high coverage during releases.
- Utilized Git and online repositories for version control, CI/CD integration, and effective team collaboration.
- Deployed and maintained scalable backend services using AWS Lambda, EC2, and S3, ensuring cost-efficiency and uptime.
- Communicated with clients and stakeholders to translate requirements into technical deliverables aligned with business objectives.

SKILLS

Languages	Python, JavaScript, TypeScript, HTML, CSS
Tools/Frameworks	React.js, React Native, NestJS, FastAPI, Django, Flask, Redux, Angular, Microservices, Tailwind CSS, Bootstrap, Git, Docker, AWS Lambda, VS Code
Databases	PostgreSQL, MySQL, MongoDB, SQLite
Other Skills	RESTful API Development, Scalable and Robust Application Development, Webhooks, Push Notifications, Email Automation, Payment Gateway Integration (Razorpay, Amazon PayFort), Serverless Architecture, CI/CD
Soft Skills & Functional Skills:	User Research, People Management, Data Analysis, Prototyping, Requirement Gathering, Client Communication

PROJECTS & RESPONSIBILITY

Pi-Play (Sports Booking App)

Role: Full-Stack Developer

Tech Stack: React Native, NestJS (Microservices), Angular, AWS

Integrations & Services: Razorpay (India), Webhooks, Push Notifications

Key Features: Sports turf booking, tournament registration, Pi Coin rewards, multiple payment types (full, split, pay-at-venue)

- Built a full-featured, scalable mobile app using React Native for sports turf booking, match-making, and tournament registration.
- Built backend with NestJS for real-time scheduling, user management, and admin operations.
- Integrated Razorpay for payments with webhooks for real-time confirmation and error handling.
- Delivered a modular and high-performance architecture using Angular for the admin panel, ensuring responsive UI and efficient state management.
- Added push notifications for bookings and match alerts.
- Delivered high-performance architecture with reusable components to support app scalability.
- Delivered a microservice-driven high-performance architecture with reusable components, secure APIs, and optimized communication for better fault tolerance and system flexibility.

VirtuScreening

Role: Full-Stack Developer

Tech Stack: Python, FastAPI, React JS, AWS Lambda, AWS, Amazon RDS

Integrations & Services: Serverless backend with AWS Lambda

Key Features: Robust backend for efficient data processing, seamless React.js frontend integration, client requirement alignment

- Spearheaded FastAPI development to build a robust, scalable backend for efficient data processing.
- Integrated FastAPI backend with React.js frontend to deliver a smooth user experience.
- Managed client relationships to ensure project deliverables met business requirements.
- Delivered scalable and maintainable architecture using serverless AWS Lambda services.

Just Padel

Role: Full-Stack Developer

Tech Stack: Python, Django RFS, React Native, React JS

Integrations & Services: Amazon PayFort payment gateway, Webhooks, Push Notifications, Email Confirmation, Loyalty & Rewards System

Key Features: Court booking system for UAE padel market, loyalty point management, shareable posts & videos, admin dashboard

- Developed a robust and scalable Django-based API to power the Just Padel booking system for the UAE padel market.
- Integrated the API into both the mobile app (React Native) and web dashboard (React.js) to enable seamless court booking.
- Implemented Amazon PayFort payment gateway with webhook support for real-time transaction updates.
- Enabled push notifications and email confirmations to enhance user engagement and transactional clarity.
- Designed and developed loyalty points management tied to booking activities, allowing point conversion into rewards and free bookings.
- Built a share feature enabling users to post and share videos or updates directly from the app.

EDUCATION

Master In Computer Application

Aug 2017 - May 2021

YMT College of Management | Mumbai University

- CGPA: 6.2/10

Bachelor of Science in Information Technology (B.Sc I.T)

July 2014 - July 2017

B.N.N College | Mumbai University

- CGPA: 5.9/7

Higher Secondary Certificate (HSC)

Jun 2012 - May 2024

Maharashtra State Board

- Percentage: 51.23%

Secondary School Certificate (SSC)

July 2012

Maharashtra State Board

- Percentage: 63.82%
