

KAMLESH GUPTA

Full-Stack Software Engineer

+91 96371 99927 | kamleshgupta594@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Full-Stack Software Engineer with 5+ years of experience architecting and shipping production-grade web, mobile, and enterprise platforms using Python, Django, FastAPI, React.js, Next.js, and React Native. Proven track record delivering sports-tech, healthtech, and gaming platforms end-to-end, including payment gateway integrations (Razorpay, Amazon PayFort, MyFatoorah), real-time notification systems (Twilio, WhatsApp Business API), and serverless AWS architectures (Lambda, S3, API Gateway, DynamoDB). Skilled in microservices design, RESTful and GraphQL API development, containerized deployments with Docker and Kubernetes, and building AI-powered workflows with LangChain and LangGraph. Strong background in PostgreSQL performance tuning, distributed systems, and Agile/Scrum delivery.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript

Backend: Django, Django REST Framework, FastAPI, Node.js, Express.js, NestJS, Fastify, Odoo 18

Frontend: React.js, Next.js, Angular, Redux, Redux Toolkit, MobX

Mobile Development: React Native (iOS & Android)

Databases: PostgreSQL, MySQL, Amazon DynamoDB, Amazon RDS

Cloud, DevOps & Infrastructure: AWS (EC2, Lambda, S3, Amplify, API Gateway, Elastic Transcoder), Docker, Kubernetes, CI/CD

AI/ML & Automation: LangChain, LangGraph, OpenCV, PyTorch, Scikit-learn, Pandas, NumPy

Integrations: Razorpay, Amazon PayFort, MyFatoorah, Twilio, WhatsApp Business API (Meta), JWT, OAuth2, Google/Facebook/Apple Sign-In

Developer Tools: Git, GitHub, Postman, VS Code, Cursor

WORK EXPERIENCE

Software Engineer II

Dec 2025 – Present

SimStar Asia Ltd, Karnataka, India

- Developed scalable REST APIs using FastAPI, Python, and PostgreSQL for enterprise-grade applications.
- Built secure authentication and authorization mechanisms using JWT, OAuth2, and Pydantic validation.
- Integrated third-party APIs and collaborated with React.js teams to deliver end-to-end features.
- Improved database performance by optimizing PostgreSQL queries, reducing API response times by 25%.
- Containerized applications with Docker and participated in CI/CD deployment, testing, and production support.

Software Engineer I

Jul 2025 – Aug 2025

Serioton LLP (HAANAA), Haryana, India

- Delivered high-performance React Native modules for Real Money Gaming (RMG) platforms.
- Applied MobX state management to synchronize real-time gameplay state across clients.
- Accelerated feature releases through close cross-functional collaboration with design and QA teams.

Senior Software Developer

Feb 2020 – Apr 2025

Techibears Pvt Ltd, Maharashtra, India

- Led end-to-end development of 6+ production platforms across sports-booking, healthtech, and gaming domains, spanning Just Padel, Players Turf, Pi-Play, and VirtuScreening, using Django REST Framework, FastAPI, React.js, Next.js, Angular, and React Native.
- Joined in 2020 as first developer on Just Padel; scaled the same slot-based booking, split-payment, and match-creation architecture to Players Turf and Pi-Play with Razorpay integration.

- Built serverless healthcare applications (dental screening) on AWS Amplify, Lambda, API Gateway, and DynamoDB with bulk Excel patient import and automated report-delivery workflows.
- Implemented JWT authentication, Google/Facebook/Apple social login, Twilio/WhatsApp Business API OTP verification, and automated media pipelines (AWS Lambda, boto3, S3, Elastic Transcoder) for lossless video/image compression.
- Built React.js admin consoles with multi-location, calendar-based booking management and loyalty-points engines; provisioned AWS EC2/S3/Lambda/Amplify infrastructure and established CI/CD pipelines to streamline releases.

SELECTED PROJECTS

Just Padel – Slot-Based Padel Sport Booking Platform

Django REST Framework, React.js, React Native, PostgreSQL, Amazon PayFort, AWS S3/Lambda/Amplify

- First project as developer (2020): built a full-stack slot-based padel booking platform with Django REST Framework APIs, a React.js website and admin panel, and React Native apps for Android/iOS, backed by PostgreSQL.
- Implemented multi-slot, time-based booking with discount codes and Amazon PayFort checkout supporting 50% or 100% upfront payment, plus public/private match creation with friend invites and creator-pays or pay-on-join split payment.
- Built a community feed for game photos/videos visible to followers, with AWS S3 uploads and Lambda (boto3) processing via Elastic Transcoder for lossless compression; added JWT auth with Google/Facebook/Apple login, Twilio/push notifications, a loyalty points system, and a multi-location admin booking calendar, deployed on AWS Amplify.

Pi-Play – Multi-City Padel & Pickleball Booking Platform

FastAPI (microservices), React.js, Angular, React Native, PostgreSQL, Razorpay, Redux Toolkit

- Built location- and sport-based turf search, slot booking, and coupon-driven checkout with Razorpay, supporting split and full payments.
- Delivered public/private match creation with friend invites (by phone number or in-app follow) and a tournament registration/competition module; implemented dual-channel OTP and booking-confirmation messaging via Twilio SMS (India) and WhatsApp Business API/Meta templates (international).
- Implemented deep linking for direct in-app navigation to matches, tournaments, and invites, and managed app-wide state with Redux and Redux Toolkit.

VirtuScreening – Dental Screening Platform v2

Python, FastAPI, React.js, AWS Lambda, API Gateway, MySQL

- Migrated a dental-screening product from AWS Amplify/DynamoDB to a FastAPI + MySQL serverless architecture on Lambda and API Gateway, with bulk Excel patient import and automated report delivery.

Enterprise ERP Customization Platform (Odoo 18)

Python, Odoo 18, PostgreSQL, JavaScript, XML, OWL

- Customized ERP workflows across finance, inventory, and operations using custom models, server actions, and OWL-based dashboards, integrating third-party systems via secure API pipelines.

EDUCATION

YMT College of Management — Mumbai University

Master of Computer Applications — CGPA: 6.2/10

Mumbai, India

Aug 2017 – May 2021

B.N.N College — Mumbai University

Bachelor of Science in Information Technology — CGPA: 5.9/7

Mumbai, India

Jul 2014 – Jul 2017

Maharashtra State Board

Higher Secondary Certificate — 51.23%

Maharashtra, India

2012 – 2014

Maharashtra State Board

Secondary School Certificate — 63.82%

Maharashtra, India

2012
